

CHANGE FOR THE BETTER

EAS INSPECTION UNITS

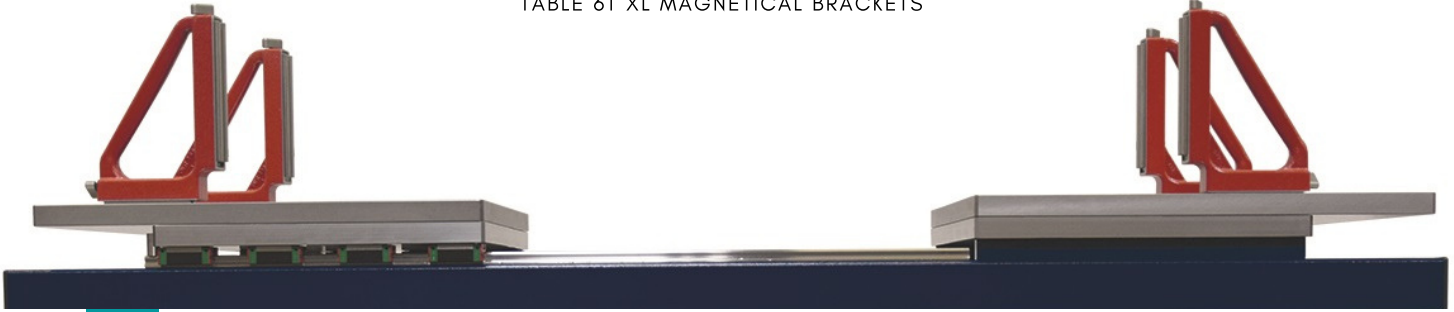

Inspection units for molds up to 6 tons in weight

EIT tables allow a mold to be opened and closed in a few seconds in order to reach all parts for maintenance, repair, cleaning, preparation for injection, or assembly for manufacturing and fitting. These tables can be adapted with a lot of different options for all types of molds, for optimal efficiency and safety.

EIT Series Characteristics:

TABLE 6T XL MAGNETICAL BRACKETS

SLIDE MOVING STANDARD TABLE 1.5T, 2T AND 3T WITH DRAWER BLOCKS

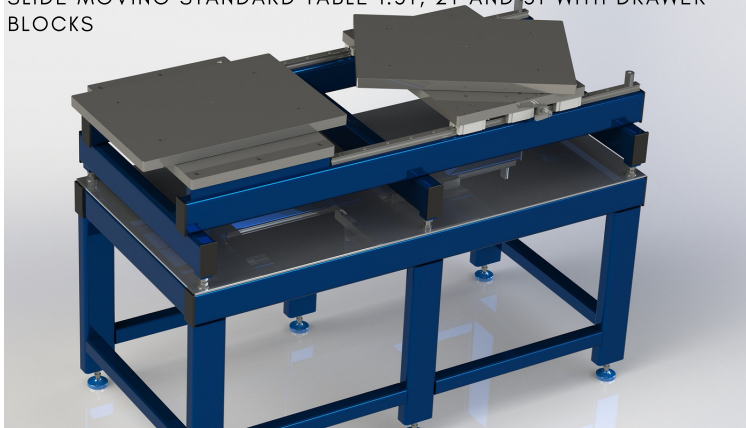

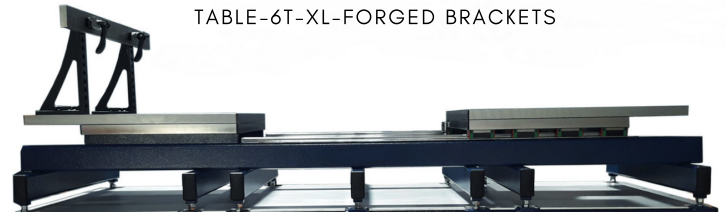

TABLE-6T-XL-MECANICAL BRACKETS

TABLE-6T-XL-FORGED BRACKETS

**MAX LOAD
IN KG**

1500

2000

3000

6000

STANDARD

- Ease of use, 1 fixed platen, 1 movable platen
- 360° rotation of the upper mobile platen
- Lockable positions for increased safety

**MAGNETIC
BRACKETS**

- Mold magnetic clamping system
- Allows free positioning on the plates
- Not appropriate for tools equipped with isolation plates

**MECHANIC
BRACKETS**

- Mold mechanic clamping system
- Parallelism between bracket and mould

**FORGED
BRACKETS**

- Ease of handling
- Flexible clamping
- Easy to use with a lighter bracket
